

Experience shade matching made easy.

What do you get when you blend balanced opacity with the trusted nanotechnology of leading 3M™ Filtek™ Dental Restoratives?

▶ **Intuitive shade selection:**

Observe and select from just three shades for an excellent match to almost any patient's tooth shade – no complicated shade guide needed.

▶ **Naturally-adaptive opacity:**

Delivers enamel-like translucency where you need it: at the bevel and incisal edge, and a dentin-like translucency everywhere else.

▶ **Reduced inventory:**

Anterior or posterior, you can work intuitively – and without a blocker.
